## Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

### NAMES AND LABELS

Buttons do not have an accessible name

Links do not have a discernible name

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

### CONTRAST

Background and foreground colors do not have a sufficient contrast ratio.

These are opportunities to improve the legibility of your content.

### TABLES AND LISTS

List items (`<li>`) are not contained within `<ul>`, `<ol>` or `<menu>` parent elements.

These are opportunities to improve the experience of reading tabular or list data using assistive technology, like a screen reader.

### BEST PRACTICES

▲ Touch targets do not have sufficient size or spacing.

These items highlight common accessibility best practices.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)

Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).

# SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on [Core Web Vitals](#). [Learn more about Google Search Essentials](#).

## CRAWLING AND INDEXING

robots.txt is not valid — 4 errors found

▼

To appear in search results, crawlers need access to your app.
